

JAYA SRIVASTAVA

DevOps Engineer — Noida, Uttar Pradesh 201301, India

📞 +91-8882108780 ✉️ srivastavajaya850@gmail.com 🔗 LinkedIn 🐙 GitHub

Summary

DevOps Engineer with 2 years of experience in AWS, Azure DevOps, Terraform, CI/CD and Kubernetes. Experienced in cloud migration, automation, production support, troubleshooting, and cost optimization.

Education

Bachelor of Technology in Computer Science and Engineering **2020 – 2024**
Bhagwan Parshuram Institute of Technology (GGSIPU), New Delhi, Delhi, India *GPA: 9/10*

Technical Skills

Cloud Platforms: AWS (EC2, IAM, Lambda, ECS/EKS, VPC, Route53, ALB/NLB, S3, CloudFormation, CodePipeline, CloudWatch), Azure (VM, ARM Templates, Azure DevOps, App Service, Azure Functions)

DevOps and Tools: Kubernetes, Helm, Terraform, Ansible, Jenkins, Docker, GitHub Actions, ArgoCD, Prometheus/Grafana

Security: AWS Secrets Manager, SOPS, KMS, SonarQube

Programming and Scripting: Python, Bash, Linux Administration, SQL, YAML, JSON, Git

Work Experience

Motherson Technology Services Limited **July 2024 – Present**
DevOps Engineer *Noida, Uttar Pradesh, India*

Cloud Infrastructure Automation Migration with Terraform, Ansible, and AWS **May 2025 – Present**

- Built and managed modular, multi-environment AWS infrastructure using Terraform, provisioning VPC, Route53, ALB, IAM, and secure state management through PR-based CI/CD workflows, reducing provisioning effort by 80%.
- Automated Redis provisioning and configuration on EC2 using Ansible, while implementing observability, incident management, and production support using CloudWatch, Grafana, and the LGTM stack, alongside cost optimization.

Centralized Multi-Account ECS Services on 100% Spot with Automated Failover **April 2025 – May 2025**

- Designed and implemented a highly available, event-driven ECS framework on Fargate Spot, reducing compute costs by up to 70% with automated failover to On-Demand capacity during Spot interruptions.
- Developed cross-account recovery automation using EventBridge, SQS, Lambda, DynamoDB, STS, and AWS CDK, ensuring workload resilience and automated restoration of workloads back to Spot capacity.

Modernizing CI/CD with Azure DevOps and Intelligent Testing **October 2024 – April 2025**

- Modernized legacy deployment processes using Azure DevOps CI/CD pipelines, Git-based PR validations, approval gates, blue-green deployments, automated testing, security scanning, and change management controls.
- Leveraged Azure Boards, Repos, and Pipelines to achieve ~70% faster deployments, supporting production releases, release support, and improving release quality and traceability.

Kubernetes Workload Migration from GKE to AWS EKS **July 2024 – October 2024**

- Migrated Dockerized workloads from GKE to AWS EKS, improving application availability by 30%, enhancing operational reliability, and optimizing infrastructure costs.
- Managed Kubernetes resources including Namespaces, Pods, Deployments, and Services, providing production support, incident resolution, monitoring & alerting, autoscaling, and cluster health monitoring through CloudWatch.

Certification

AWS Certified Cloud Practitioner **Nov 2024 – Nov 2027**
Certification : 6abb4cc06ac47d6a6cf4664bd36b900

AWS Certified Solutions Architect – Associate **March 2026 – March 2029**
Certification : 9426ac2e4831498392b2a53667568d61

Achievements

Rising Star Award by CEO at Motherson Group **Oct 2025**
