SUMMARY

Result-driven **AWS Cloud and DevOps Engineer** with 6.4 years of overall IT experience, including 4.6 years of experience in managing **AWS Cloud infrastructure**, designing and optimizing **CI/CD pipelines**, automating infrastructure using **Terraform**, and deploying containerized applications with **Docker** and **Kubernetes** to ensure scalable, high-availability environments. Seeking to leverage expertise in **DevOps technologies and cloud infrastructure** to contribute to a high-performing and innovative team.

SKILLS

AWS Cloud Services: EC2, S3, EBS, EFS, VPC, IAM, Autoscaling, Load Balancing, Route 53, RDS, EKS, Lambda

Infrastructure as Code: Terraform

Containerization & Orchestration: Docker, Kubernetes, Helm

Scripting & Automation: Python

Version Control System: GitHub, Git

CI/CD: Jenkins, GitOps (ArgoCD)

Operating Systems: Linux (Ubuntu, CentOS, RHEL), Windows

Monitoring & Observability: CloudWatch, Prometheus, Grafana

EXPERIENCE

CLEAR TRAIL TECHNOLOGIES

NOIDA, INDIA

Technical Support Engineer

Nov 2021 to till date

- **Provisioned and administered AWS EC2 instances** across multiple Availability Zones, configured **Auto Scaling Groups** for dynamic capacity management, and implemented **Load Balancers** to distribute traffic efficiently and maintain highly available application environments.
- **Designed and maintained secure AWS VPC architectures with custom subnets, Security Groups, Network ACLs, and route tables** to enforce robust network isolation and compliance.
- **Strengthened cloud security posture** by implementing and managing **IAM roles, policies, and user access controls**, ensuring secure, least-privilege access to AWS resources and safeguarding critical infrastructure.

- **Automated infrastructure provisioning and configuration management using Terraform**, reducing manual effort and improving deployment consistency.
- **Designed, implemented, and optimized CI/CD pipelines in Jenkins for building Java-based applications using Maven, resulting in 20% reduction in build and deployment times** to automate software deployments and improve release efficiency.
- **Deployed and managed containerized applications with Docker and Kubernetes** ensuring scalable, high-availability environments and streamlined application lifecycle management which helped the **organization achieve 20% efficiency in terms of cost**.
- Implemented **Git best practices and established standardized branching strategies**, resulting in improved code collaboration, better version traceability, and streamlined team workflows.
- Performed **production troubleshooting, root cause analysis, incident remediation, and performance optimization** to improve platform reliability.

PROVAL TECHNOLOGIES

NOIDA, INDIA

NOC Engineer

Jan 2020 to Nov 2021

- **Delivered 24/7 first-line technical support** as a key member of the **Network Operations Team**, responding to and resolving critical incidents for Managed Service Provider (MSP) clients across the **Eastern, Central, Mountain, and Pacific time zones** in the U.S.
- **Troubleshoot and resolved issues related to physical and virtual server outages**, as well as **network infrastructure devices**, minimizing downtime and ensuring continuous service delivery for enterprise clients.
- **Utilized industry-standard monitoring and remote management tools** such as **Continuum, Kaseya, LogicMonitor, Automate Web Portal**, and **ScreenConnect** to proactively identify and address infrastructure issues.

EDUCATION

B.TECH

NOIDA, INDIA

Jaypee Institute of Information Technology, Noida

Aug 2014 to May 2018
